

General Practice and Primary Healthcare feedback/request for support

As a Primary Health Network (PHN), COORDINARE has a support role in the immediate response to emergency/disaster situations and a growing role as the region moves into recovery and rebuilding.

Right now, our key role is in helping to source and coordinate people and other resources that can assist in the response and recovery process. We are working closely with the Local Health Districts (LHDs) and emergency response agencies, who have frontline roles under statewide emergency management arrangements, to ensure that any resources we can source are provided in a coordinated way.

To assist in supporting local responses, could you please complete the details below:

*First Name:

*Last Name:

Does your organisation/practice need support to maintain services in fire affected locations, please let us know what would assist.

If the impact of the fires on your organisation/practice has been so great that services will be significantly interrupted, please let us know what interruptions you are experiencing.

Please add any additional comments you want to share.

Please return completed form to info@coordinare.org.au
