

Help us to evaluate a new decision support tool for endometriosis care

Recruiting for an online RCT of EndoOptions decision aid

Why this study matters

- Many patients with endometriosis face uncertainty when choosing symptom management options
- Decision aids support informed, values-based decisions
- This study will evaluate a co-designed online decision support tool tailored to people with endometriosis

Who can take part?

- Aged 18+
- Diagnosed or strongly suspected of having endometriosis
- Considering symptom management options
- Living in Australia

What participation involves

- Access to an online decision support tool, either immediately (Intervention group) or in 3 months (Control group)
- Filling out 4 questionnaires over 6 months
- \$50 gift card upon completion

No impact on usual care for your patient and no additional workload for you

What we're asking of you

- Mention the study to patients
- Share the QR code
- Display the recruitment flyer in your clinic

If you are interested in helping us to recruit participants, or if you would like more information, please email Prof Kerry Sherman at kerry.sherman@mq.edu.au
