Practice Nurse flowchart

Implementation Phase

- **Patient has COPD or Asthma**
  - Confirmed by either: Respiratory Scientist, GP Spiro Test or Lung Function Test in past 12 months.
    - Mild: Z-Score -1.65 to -2.4
      Moderate: Z-Score -2.5 to -3.9
      Severe: Z-Score -4 onwards
- **Patient put forward for LMC Program**
  - Speak to patient about program, and have them review and sign the consent form. Save to patient's file.
- **Patient attends Practice for GPMP and COPD Action Plan**
  - If GPMP already done, review and prepare a COPD Action Plan. Carry out clinical measures.
    - Give patient their LMC Booklet, make appointment for 4, 8 and 12 months' time.

Care Pathway Phase

- **Patient attends 4 month meeting**
  - Review GPMP and COPD Action Plan. Carry out clinical measures.
    - Severe patient, call every 2 weeks, moderate patient, call every 2 months.
- **Patient attends 8 month meeting**
  - Review GPMP and COPD Action Plan. Carry out clinical measurements
- **Patient attends 12 month meeting**
  - Update GPMP and COPD Action Plan. Carry out clinical measures, new spiro test.
    - Patient recommences onto care pathway meetings.
