

Don't forget to check:

Vaccine Preparation

-  **Thaw** expiry date?
-  **Manufacture** expiry date?
-  Time the vial was first **punctured**?*
-  Time the syringe was **drawn**?*

*Relevant for multi-dose vials only

- **DISCARD** the vaccine if it exceeds expiry dates and times.
- **Checking AIR** before administering the vaccine will help avoid vaccination administration errors.

Vaccine Administration

-  Check Australian Immunisation Register (**AIR**) before administering vaccine
-  **Right** vaccine for the patient?
-  **Right** dose interval?
-  **Right** dose for this patient and cohort?
-  If required, has the vaccine been **diluted** correctly?

If you respond 'No' to any of the above,
DO NOT administer the vaccine.

COVID-19
 **VACCINATION**
