

# BIRTHING ON COUNTRY

## OUR GOAL!

We want to improve birthing options for Aboriginal families on the South East Coast of New South Wales.

What is Birthing on Country?  
How will Birthing on Country improve my birthing experience?

We are very passionate about improving birth outcomes for Aboriginal mothers and their babies using culturally appropriate maternity care.

### We would like to talk with:

Aboriginal women and families on how maternity and birthing services can be culturally and clinically safe.

Key stakeholders on what an integrated, holistic and culturally appropriate model of care would look like for the South East Coast NSW, for Aboriginal women, families and community.

Your feedback is very important as it will guide the Aboriginal and Torres Strait Islander maternity services within the South East Coast area.
