HealthPathways User Guide

Unlocalised pathways will have an orange background.

Use the **Send Feedback** button to provide feedback on the HealthPathways site.

What is HealthPathways?

HealthPathways provides a manual for general practice teams to manage and refer their patients to secondary, tertiary, and community services. The pathways have been designed for use during consultation and are jointly developed by consensus and collaboration between hospital clinicians and general practice teams.

How to use HealthPathways

- Search for the pathway you want using the search feature at the top left of the page. Tip: use a keyword or part of a word followed by an asterisk (*).
- Browse through the table of contents information on the left to find a pathway.
- Go directly to a list of localised ACT and SNSW Pathways.

ACT and Southern NSW HealthPathways Development

Pathways are localised for ACT and SNSW to provide up-to-date, relevant, and local information.

Localised pages have a white background.
Unlocalised pages have a pale orange background and a map of New Zealand repeated on the right side of the page.

Unlocalised pathways contain useful condition-management information, however use your judgement as to the appropriateness of this information for our region.
